- Request token URL
http://twitter.com/oauth/request_token
- Access token URL
http://twitter.com/oauth/access_token
- Authorize URL
<http://twitter.com/oauth/authorize> *We support
hmac-sha1 signatures. We do not support the plaintext signature method.

Welcome to the Developer Beta of the Twitter Application Platform! We're just getting started, but we thought we'd start releasing components that will help you, the developers, connect your users with the world, **right now**.

For starters, we're allowing you to both register your application here, as well as providing an improved Authentication System, OAuth. To read more about how this help both you and your users, please visit <http://oauth.net>.

Enjoy! And please report any bugs or general feedback to api@twitter.com.
